The “B” series design is compact and self-contained. Cylinder pistons are attached directly to each guide rod, conserving size without sacrificing output force. Guide rods are supported by specially designed guide bushings providing optimum support of dynamic loads. Guide bushings are manufactured from specially engineered materials designed to eliminate potential rod binding.

A. Body:

Hardcoat anodized aluminum lightweight, durable, high strength to weight ratio
 PTFE coated inside and out, reduced friction, increased seal life
 Easy access mounting holes drilled from top and tapped from bottom, standard dowel locating holes for accurate mounting
 Integrated sensing mount dovetail rail both sides to accept Numatics World Switch

B. Tooling Plate:

Hardcoat anodized aluminum lightweight, durable
 Easy access mounting holes drilled and tapped, dowel locating holes standard
 NuMate™ mounting capability reduced cost, eliminates adapters and transition plates

C. Guide Shafts:

303 Stainless steel low friction, long life
 Pilot mounted to tooling plate maximum rigidity

D. Bearings:

Special engineered material low friction, long life
 Maximum rigidity superior rod diameter to bearing length ratio

E. Position Sensing:

Easy access position sensor mounting integrated dovetail mounting, twin piston magnets-standard

F. NuMate™ Mounting:
